Professional Summary

Java Full Stack Developer with 3+ years of experience building enterprise applications using Java, Spring Boot, React, React Native, REST APIs, and SQL/NoSQL databases. Experienced in end-to-end feature development, microservices, automated testing, CI/CD pipelines, and production support. Delivered major plan-management features from requirements through production deployment and supported enterprise release and disaster-recovery activities. Strong in debugging, API development, and Agile software delivery.

Education

Sahyadri College of Engineering and Management (VTU) *Mangalore, Karnataka*

B.E in Information Science and Engineering *August 2019 - May 2023*

- **CGPA:** 8.01 (First Class with Distinction)

Experience

Endava Solutions India Pvt. Ltd - Formerly known as GalaxE Solutions India Pvt. Ltd *Bengaluru, India*

Job title: **Developer - Senior Technician** *August 2023 - Present*

- Experienced **Full Stack Developer** with 3+ years in end-to-end web application development.
- Progressed through multiple roles, promoted to **Developer - Technician in 2025** and **Developer - Senior Technician in January 2026** in recognition of technical contributions and consistent performance.
- Took ownership of assigned features and enhancements, driving development activities from requirement analysis to implementation, testing, and delivery.
- Contributed to technical discussions, application design decisions, and problem-solving activities to improve application functionality and maintainability.
- Performed code reviews and followed coding standards, clean code principles, and software development best practices to ensure code quality and maintainability.
- Proactively identified technical challenges, performed root cause analysis, and implemented solutions to resolve application issues and improve system reliability.
- Worked closely with team members to estimate development efforts, prioritize tasks and ensure timely feature releases.
- Maintained project documentation and tracked development activities, progress, and deliverables using **JIRA and OpenProject**.
- Actively participated in **Agile Scrum practices**, including sprint planning, daily stand-ups, backlog refinement and retrospectives.

Projects

GxDigiHealth *Bengaluru, Karnataka*

React Native Based Mobile Application for #1 Ranked Health Service Company *January 2024 - Present*

GxDigiHealth is an Android-based mobile application developed using React Native that allows users to upload and manage their personal information, download digital health cards, and search for nearby doctors and network hospitals covered under their insurance policy's OPD benefits. The application provides a convenient platform for accessing insurance-related healthcare services and locating eligible healthcare providers.

- Developed and maintained mobile applications using React Native for Android, improving application performance and user experience.
- Optimized application workflows and API integration, reducing processing time by approximately **65%.**
- Developed complex business logic following clean coding practices to ensure scalability, maintainability, and high application performance.
- Worked with **Improved application efficiency by 80%** through reusable components, optimized state management, and performance enhancements.
- Performed **unit testing and integration testing using JUnit**, following Test-Driven Development (TDD) principles to ensure application reliability and code quality.
- Deployed the application to the QA environment using **GitLab pipelines** after successful build creation and developed automation scripts to streamline the deployment process. Used Git for version control, code reviews, and collaborative development.
- Implemented Redux for efficient state management and asynchronous operations.
- Integrated RESTful APIs and WebSocket communication for seamless real-time data exchange.
- Participated in **Agile Scrum ceremonies** including sprint planning, daily stand-ups, retrospectives, and requirement discussions with cross-functional teams.
- Utilized TypeScript in React Native development to implement strongly typed, reusable, and maintainable components, reducing runtime errors and improving code reliability.
- Translated UI/UX designs into responsive, reusable, and maintainable mobile interfaces.
- Developed unit testable components and performed testing using **Jest**.
- Developed responsive and visually appealing user interfaces using **HTML5, CSS3, Flexbox, media queries**, and modern styling techniques, ensuring consistent UI across different screen sizes and devices.
- **Technical Skills:** Java, Spring Boot, React Native, REST APIs, JUnit, SSMS, Git, GitHub, Jenkins, Redux, JWT, Agile Scrum

Tech Refresh Program *Bengaluru, Karnataka*

Client Project for a Fortune 500 Fintech Company *October 2023 - December 2023*

The Tech Refresh Program enhances GxCapture, an internal infrastructure management and remediation platform used by a Fortune 500 financial services organization to govern server lifecycles, vulnerability remediation, risk-based prioritization, compliance validation, and operational workflows.

- Primary developer responsible for the end-to-end development, maintenance, enhancement, and production support of the GxCapture Tech Refresh Program using **Java, Spring Boot, and React** with Microservices architecture.
- Developed and maintained features for a platform supporting infrastructure remediation across **4 asset categories**: Windows, Linux, SQL/DB2, and Oracle environments.
- Built over **10** new functionalities for managing server upgrades, operating system patching, remediation plans, asset decommissioning, and compliance-driven infrastructure activities.
- Designed and developed responsive React components and integrated **RESTful APIs** for plan creation, maintenance, copy, merge, and validation workflows, ensuring seamless communication between frontend and backend services.
- Implemented centralized exception handling in Spring Boot using **@ControllerAdvice** and **@ExceptionHandler** to standardize error responses and improve application reliability.
- Applied **Aspect-Oriented Programming (AOP)** using Spring AOP for cross-cutting concerns such as logging, exception tracking, and execution monitoring.
- Optimized over **20** SQL queries and analyzed SQL stored procedures to support business logic, data validation, and reporting requirements.
- Implemented **2 major features**, Plan Copy and Plan Merge, from requirement analysis through production deployment within 2 months.
- Developed unit test cases using **JUnit and Mockito** and performed integration testing to ensure application reliability and code quality.
- Identified, debugged, and resolved production and QA issues by performing root cause analysis and implementing effective fixes to improve application stability and performance.
- Managed and supported **CI/CD pipelines using Jenkins and GitLab** for automated build creation, deployment, and release management across QA, Pre-Production, and Production environments.
- Created and managed **Change Requests (CRs)** for production releases, ensuring compliance with enterprise release management processes.
- Provided production support and resolved **100+ application issues** through troubleshooting, root-cause analysis, and timely implementation of fixes, improving system stability and user experience.
- Participated in **Agile ceremonies**, including sprint planning, daily stand-ups, backlog refinement, code reviews, and feature demonstrations with Product Owners and stakeholders.
- Regularly pushed code to **GitLab** using version control for code management and collaboration.
- Worked throughout the complete **Software Development Life Cycle (SDLC)**, including requirement analysis, development, testing, deployment, production support, and continuous maintenance.
- **Technical Skills:** Java, Spring Boot, Spring AOP, React.js, SQL, Microsoft SQL Server, REST APIs, Git, GitLab, Jenkins, JUnit, Mockito, Exception Handling, CI/CD, Microservices, Agile Scrum, SDLC

Skills

Technical Skills	Java, HTML5, CSS3, JavaScript, Spring Boot, React, React Native, AWS, Jenkins, TypeScript, Redux, JEST
Database Knowledge	Microsoft SQL Server (SSMS), PostgreSQL, MongoDB (NoSQL)
Methodologies	Agile Scrum, SDLC, SOLID Principles, Responsive Web Design, Test-Driven Development (TDD), DRY and KISS Principles, Integration Testing, Design Patterns
Miscellaneous Skills	RESTful APIs, Microservices, Git, WebSocket, JWT, Postman, SonarQube, Axios, Web Storage, ChatGPT, Codex, Windsurf, ES6
Soft Skills	Time Management, Teamwork, Problem-solving, Effective Communication, Leadership, Deadline Attainment

Certifications

2026 **Windsurf for Beginners: AI Coding Crash Course**, Udemy

2026 **GitLab — A Complete Hands-On for CI/CD Pipelines & DevOps**, Udemy

2025 **The Ultimate ChatGPT Guide with React Native - Develop Mobile Apps**, O'Reilly

2025 **Agile Project Management**, O'Reilly
